

First Grade Tours

First Graders from Spooner Elementary School visited Spooner Health System on May 28th. They went through 10 different rotations learning numerous aspects of healthcare. They learned about x-rays and ultrasound, patient confidentiality, pharmacy, laundry and nursing home. A nurse anesthetist explained how you fall asleep before having surgery and a registered nurse showed them what it's like to be a patient in the hospital. Highlights of their day included getting a thumb cast and looking through a microscope at white blood cells.
